PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/674,613	Applicant(s) RAGHAVACHARI, MUKUND	
	Examiner Joy K. Contee	Art Unit 2617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 March 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sawada et al. (Sawada), US Patent No. 6,909,902, previously used, in view of Gudat et al. (Gudat), US Patent No. 6,771,609, recently discovered.

Regarding claims 1-26, Sawada discloses an information handling system for providing directions to a wireless unit for improving reception, comprising: logic for determining a target location for improved communication for the wireless unit based in part on information representing a recent position of the wireless unit, a transmitter for transmitting directions to the wireless unit, the directions including information directing a user of the wireless unit to the target position; wherein changing a position of the wireless unit from the recent position to the target position is more likely to result in better reception and transmission of wireless signals to and from a wireless access point (col. 4, lines 15-65 and col. 11, lines 5-67).

Art Unit: 2617

Sawada fails to explicitly disclose wherein determining a target position for improved communication is also based in part on historical data on received signal strength at the recent and target positions.

In a similar field of endeavor, Gudat discloses a method for dynamically updating a propagation model of communication signals in an area wherein a future position of a mobile node is predicted using historical signal strength values (see col. 10, line 53 to col. 1, line 57).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Sawada to include determining a target position for improved communication is also based in part on historical data on received signal strength at the recent and target positions for the purpose of allowing accuracy in target position determination such that relative distance can be determined (see Sawada col. 28, line 9- col. 29, line 58).

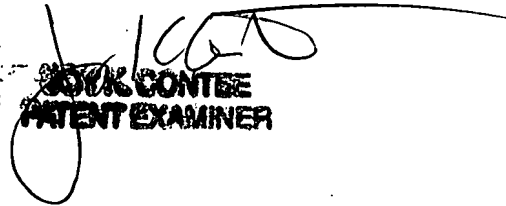

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joy K. Contee whose telephone number is 571.272.7906. The examiner can normally be reached on Monday through Friday, 5:30 a.m. to 2:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Appiah can be reached on 571.272.7904. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
